

Saleslist Whitepaper

Version: 0.1
8 October 2021

What is the Saleslist?

Saleslist is a transparent B2C, B2B platform which collects and unites all the major crypto sales (IEO, ICO, IDO, NFT, etc...) in one place. The mission of the Saleslist.app is to bring majority events information from crypto sales to target users. To do that, we are coming with several solutions.

B2C Solutions

First of all we are bringing it to mobile platforms. We want more mobility to the Crypto Community. Now you have all the information about sales in your pocket. Scroll, find and analyze sales. Like them and be notified with sales events anywhere you are.

Second is web3 application with some modern crypto features. Stake, swap and transfer tokens between networks. You are free to do with your yearned tokens.

Third are the best private sales and deals in the Crypto World. Open new investment features via staking. Join whitelists and precipitate in special events via mobile and web3 app. Do KYC only once and have access to all events in your country.

B2B Solutions

Companies can start their own cross chain launchpads directly in our mobile app. Without doing huge work you can Advertise, run Special Events, Sales, open Whitelists with our mobile community. You can do that fast and simple like never before. One KYC for all your sales.

Time-bounded guarantee allocations, lottery tickets calculator, funds unlock mechanism
- all that features we are bringing to the mobile world!

Roadmap

2021 Q3

- Concept
- Problems collection
- Product research
- Seed investments

2021 Q4

- Mobile App (Android Alpha)
- Landing page
- Whitepaper
- Token contract
- Early Backers sale

- B2B Solutions development
- Staking preferences

2022 Q4

- Mobile App release publishing
- Web3 app phase 3 (final)
- B2B Mobile solutions distribution
- Sales events monitoring
- Development Grant program

Tokenomics

Coming up with the launch of \$SALE, Saleslist planned with transparent token distribution.

- We have allocated 40% of our total SALE supply to sell in the market.
- 17% of total token supply would be shared with team members on token vesting for 3 years.
- 5% of the total SALE tokens would be distributed among Saleslist advisors and promotions.
- We do collaborate and build a partnership with major sales companies. So, 10% of the total SALE tokens supply will be given to all partners and companies we have worked with.
- We have set 5% of the total token supply for community members and all contributors of Saleslist.
- 3% of total tokens will be given in Airdrop to distribute \$SALE among the community.
- 10% will be pending for development Grant options for 1 year lock period.
- 10% tokens for staking and token exchanges.

Saleslist \$SALE token distribution quotas
